PREFACE.

THIS Volume Continues the series of General Indexes to the Journals of the House of Commons from 1547 to 1929-30, prepared under the direction of the Clerk of the House of Commons. The first of these volumes, which appeared in 1852, was compiled by the late Lord Farnborough (Sir Thomas Erskine May, K.C.B.), and referred to the transactions of no less than 167 years; since 1880 the Volumes have been issued decennially.

Alterations tending to the further simplification of the work have been made but with two exceptions they are of a minor character.

The detailed Index of Accounts and Papers presented to the House has been omitted, for reasons of economy, and these will be found in the Sessional Index for each year.

For the same reason, the detailed list of Resolutions reported from the Committee of Supply, in respect of each Service for the whole period, is no longer included.

FREDERICK C. BRAMWELL,

Clerk of the Journals.

AGRICULTURE—cont.
[1927.] Motion, That this House, realising that the continuing decay in agriculture is a grave national concern and should be dealt with by the Government without delay, is of opinion that the placing of British agriculture on a sound and efficient basis so as to yield a fair return to the farmer with secure tenure, subject to proper use and a satisfactory standard of living to the agricultural worker, depends upon the transference to the State of the ownership of all agricultural land, the adequate provision of capital for drainage and buildings, the encouragement of a system of co-operation in buying and marketing, the stabilisation of prices, and the energetic pursuit of scientific research.—Amendment proposed, to leave out words and add others ; words left out, and, on Question to add words, Debate adjourned, 104.

Resolution, That this House, while fully sympathising with the difficulties of agriculturists, recognises that the present depression is neither peculiar to this Country nor removable by any direct Government action based on sound economic principles, deprecates revolutionary reform of our system of land tenure and unnecessary interference with cultivation, and urges the Government to continue in its policy of applying such measures as are likely to promote stability and continuity and to assist the industry to adapt itself to meet modern needs and conditions.—after Motion made and Question amended by leaving out words and adding others, 385.

[1928.] Motion, That this House, realising that the acute and continuing depression in the industry of agriculture is causing serious hardship to the whole agricultural community, urges strongly upon the Government the necessity of providing without delay all practical measures for relieving the heavy burdens now weighing upon the industry.—Amendment proposed to leave out words and add others, and not made, and, on Main Question, Debate adjourned, 46.

any measures for dealing adequately with the pressing problem of unemployment, and is of opinion that the discrimination now being exercised against many unemployed persons, with regard to the payment of unemployment benefit is contrary to the principle of unemployment insurance, throws heavy and unjust burdens upon the rates in necessitous areas, and is adding to the suffering and discredit of the people; negative, 429.
