nial Office.

mittee...
mittee that immediately after the local examination in each Colony of the Annual Account has been completed, a Comparative Statement of the estimated and actual Receipts and Disbursements of the year should be prepared by the auditors or other officers by whom the Accounts are examined, showing under each head of Revenue and Expenditure, any difference that may have occurred between the estimated and actual Receipts and Disbursements of the year, and explaining the cause of any such differences.

9. Resolved, That it is the Opinion of this Committee that as all the evidence taken before the Committee proves the superiority of the double-entry system of book-keeping, its success wherever introduced into the Public Departments, and its general adaptation to the Public Service, it is expedient that the said system be adopted for keeping the Accounts of Colonial Revenue and Expenditure.

10. Resolved, That it is the Opinion of this Committee that a Cash-book, Journal and Ledger be kept in all the Colonies, and that the Ledger distinctly represent the various heads of Receipt and Expenditure, as exhibited in the Estimates.

11. Resolved, That it is the Opinion of this Committee that with a view to the prompt examination of the Colonial Accounts, in all cases where a local Auditor has not been appointed, provision should be made for a speedy and efficient local examination of the Accounts; and the Auditor or other Officer to whom such local examination is entrusted should be empowered at any and all reasonable times to compare the Cash or other Balances of the Treasurer, or any other Officer intrusted with Public Money, with the Balances represented in the Cash Accounts of their respective Departments; but such inspection and comparison are not to supersede the periodical verification of Public Balances by Committees or otherwise, which the Governors of Colonies have heretofore been instructed to institute.

16. Resolved, That it is the Opinion of this Committee that in case such replies or explanations shall not be received by the Audit Board within a reasonable time (to be estimated according to the distance of the Colonies and the facilities of communication with them), the Audit Board shall call the attention of the Lords of the Treasury to the neglect of the Colonial Accountant.

17. Resolved, That it is the Opinion of this Committee that a quarterly Report be made by the Audit Board to the Lords of the Treasury, on the state of the Colonial Accounts, showing the Arrears and the causes of the Arrears, and calling the attention of the Treasury Board to every case of irregularity and delay.

18. Resolved, That it is the Opinion of this Committee that Abstracts of the Accounts of the various Colonies, after being examined by the Audit Board, be annually presented to Parliament; and that they be accompanied with Copies of the Estimates for the years to which the Accounts rendered to and examined in that Department, in such manner as at all times would afford the means, so far as regards the Crown Colonies, of giving to Government and Parliament specific information on all points relating to the Colonial Receipt and Expenditure; and likewise that the Board of Audit should, from time to time, suggest the introduction of such improvements in the existing modes of keeping the Colonial Accounts as would remove the present anomalies, and secure a uniform, regular and correct system of Colonial Book-keeping; and should also suggest the necessity of instructions for that purpose, and prepare such forms and models as may be useful to give effect to these instructions.

guishes it from a mere Drawing School; and in page 6 of the same Report, in the enumeration of the duties of the Director, and more particularly in Articles 6, 13 and 14, it is shown that the giving such instruction is the peculiar province of the Di-

A Petition of the Legislative Council of the Colony of New South Wales, in Council assembled (signed by the Speaker), was also presented, and read; setting forth, That on the 30th day of May 1844, a Select Committee of this Council was appointed to inquire into and report upon all grievances connected with the lands of the Territory, in pursuance of a Report from this Committee, which was made after a long and laborious investigation, a Copy of which, with the evidence, is appended thereto; it was resolved by the Legislative Council, amongst other things, that Petitions should be presented to Her Majesty and both Houses of Parliament, humbly praying that they will be graciously pleased to pass an Act repealing the 5 and 6 Vic. c. 36, so far as regards New South Wales, and also so much of the Act 5 and 6 Vic. c. 76, as provides that no law made by the Council shall interfere in any manner with the sale or other appropriation of the lands belonging to the Crown within that Colony, or with the revenue thence arising, and enacting that the management of the waste lands of the Crown, and the appropriation of the revenue arising therefrom, shall be vested in the Governor and Legislative Council of the Colony; and praying that the House will be pleased to pass an Act by which the wishes of the Petitioners may be carried into effect.

A Petition of the Legislative Council of New South Wales, in Council assembled (signed by the Speaker), was also presented, and read; setting forth, That according to the estimates for the year 1845, submitted to their adoption, by His Excellency the Governor, it will be necessary to raise by general or local taxation the sum of £5,250 10s. 6d. for Police, Gaols, and the building of Gaols, being after the rate of about 1½d. per head on the estimated population of the Colony, whereas the whole expense of the Government of the Canadas does not exceed 7a. a head, and were a similar rate of expenditure necessary
necessary in the United Kingdom, a sum of not less than £14,000,000, would be required for those purposes alone. The number arrived annually as convicts of the Colony for the nine years and a half ending the 31st December 1844, since this charge was first imposed, amounts to the enormous sum of £957,510 5s. 2d.; that although when this charge was first transferred from the Military Chest to the Colonial Treasury in 1834, by the direction of the Lords of the Treasury, it was assumed that it would not exceed £25,000 per annum, in the very first year afterwards it amounted to £42,189 1s. 1d., in the third year afterwards it attained its maximum of £135,132 8s. 4d., at very nearly which amount it continued stationary for the next two years, and it is still, notwithstanding the considerable restrictions of last Session, estimated at the large sum of £309,058 16s. 3d. above mentioned; that the number of convictions of persons arrived free or born in the Colony, is, in proportion to the number of convictions of persons arrived as convicts, as 1800 to 3900, that the former number contains a large proportion of expresses and other freed persons who have come from the sister Colony of Van Diemen's Land, and cannot be distinguished from the convicts by mere dry arithmetical calculation, but that without taking into consideration this circumstance which must cause a great addition to the annual amount of crime committed there, as a matter of mere dry arithmetical calculation, and without making any allowance whatever for the contagious example and influence of the convict and the freed person, on the free, instead of the Colony being subject to the example and influence of the convict and the freed persons, as one of the great advantages which led to the transfer of this charge from the Imperial to the Local Treasury, must be further increased by making the Colony the receptacle also of the probation convicts transported to those shores from the mother country, and for the benefit of the mother country alone; that of the entire amount of £957,510 5s. 2d. thus paid by the Colony for the above purposes, it will be observed that only £302,571 13s. 2d. is its fair proportion, and that the balance of £655,132 12s. ought to have been paid out of the Military Chest; that the judicial expenditure for the same period amounted to £63,644 16s. 8d., and that after deducting one-third of the above amount for the civil administration of justice, and appointing the balance of £201,540 4s. 5d., according to the foregoing scale of expence of £63,644 16s. 8d., £63,644 of the last-mentioned sum is properly chargeable to the Colony, and the residue of £137,895 18s. 6d. to the mother country, and the sum of £34,782 16s. 2d. required for the judicial expenditure of 1845, being distributed in the same proportions, will leave £7,322 14s. 6d. chargeable to the former for its share of the criminal administration of justice, and £13,865 17s. 2d. as the share of the latter; that the necessity of providing out of Colonial Funds so large an amount for the coercion and punishment of British criminals, is justly deemed by the Colony, whose representatives the Petitioners are, as one of its chief grievances, and the grievance is deemed the greater, insomuch that, which would be equivalent, by which solemn compact entered into in the year 1835, between the late Legislative Council and Her Majesty's then Governor, Sir Richard Bourke, K.C.B., under the authority of the Lords of the Treasury, viz., the surplus of the casual and territorial revenues, after defraying the cost of immigration from the United Kingdom, has been withheld from the appropriation of the Legislative Council; for that it was then placed, in conformity with this compact, during the whole Government of Sir George Gipps, Knight, not only as far as we have been able to ascertain within the limits of this reply, but as far as our official correspondence laid by His Excellency before us shows in defiance of the positive directions of the Lords of the Treasury and successive Secretaries of State; that the enormous burden thus cast upon the Colony, and continued without the promised equivalent, and the impossibility of adding to its resources by any mode short of utter ruin to all the productive classes, altogether precludes us from attempting those moral, social and physical ameliorations which, were they possible, the public exigencies and welfare imperatively demand at their hands; they beg leave humbly to represent to the House, first, that they are thereby precluded from taking any effectual steps towards arresting the perpetuity of crime, by making adequate provision for the diffusion of education. Afterward it has been urged, in consequence of the scattered state of the population, would be far greater than in England; second, from establishing a cheap and uniform rate of postage and the facilities for correspondence, and the diffusion of information, which have been attended with such beneficial results in the mother country; third, from appropriating any sufficient sum for the making or repairing of roads or bridges, and for other works of indispensable necessity in a new country, like that, progressing rapidly in population and possessing but few facilities for inland navigation; fourth, that the imposition of the large amount in question is no new or despicable charge whatever, in consequence of the cessation of transportation, and the abolition of assignment, which was the only redeeming principle of the convict system, and which was assigned by the Lords of the Treasury, in 1834, for transferring this charge to the Colonial Treasury, and in consequence also of the rapidly increasing expenditure of the Military Chest, for military and convict purposes, an expenditure which, in 1838, was £309,036 2s. 3d., and in 1843 had fallen to £170,072 17s. 5d., including about £7,000 for military expenditure in New Zealand; fifth, that not only has the system of transportation in its main purposes been unsuccessful, but that this vast influx of extraneous crime amongst us is to be further increased by making the Colony the receptacle also of the probation convicts transported from that Colony to New South Wales; and sixth, that it will, they trust, be obvious to the House, that a large and rapid increase in their Police, Gaol and Judicial Expenditure must inevitably result to the Colony from these causes without any countervailing advantage whatever; seventh, that the impolicy and injustice of imposing so heavy a burden on that Colony will be the more apparent now that the inability of the sister Colony, Van Diemen's Land, to sustain a similar charge has been admitted by the Governor of that Colony; although in the full enjoyment of whatever benefits of cheap labour or otherwise are derivable from transportation, a large portion connected with the Local Expenditure, connected with the convict system, and transferred to the Local Treasury of that Colony, at the same time the like charge was imposed upon the Petitioners, is now of necessity defrayed from the Military Chest, and must, without doubt, if it should be finally retransferred to that Colony as being a just and proper charge on the Imperial Treasury; under the circumstances above stated they entreat the House to be graciously pleased to recommend to Government that it once more be regarded as a charge on Imperial Funds, and that the sum of £793,043 16s. 8d. so due to the Colony for arrears of Police, Gaol and Judicial Expenditure, justly chargeable on Imperial Funds, and the further sum of £34,782 16s. 2d. arising from the same cause be still required for the due coercion and punishment of the convict and freed population originally transported from Britain, be defrayed from the Military Chest,
or if it be thought more advisable, upon taking into consideration that an adult population of 58,788 couples of both sexes, have been transported to this Colony from the United Kingdom since the period of its first establishment, the contaminating influence of which mass of crime is continually working on the race and set a population, amounting only at present to about 133,000 souls, and upon taking further into consideration the joint exigencies at the present time of the United Kingdom and of the Colony, in the former of which several millions of its people are relying on public and private charity, and in the latter of which there is such a deficiency of population and excess of food that thousands of sheep and cattle are destroyed weekly for their tallow and hides, it would, in their opinion, be of equal advantage to the payment of the said sum of 793,034l. 10s. 8d., that the like number, namely, 59,788 free immigrants of moral and industrious habits and consisting of single persons of both sexes, or of young couples recently married, or of families with sons and daughters grown or nearly grown up, should be sent out to the Colony in the next five years with Parliamentary Funds, provided that the said annual sum of 74,195l. 6s. 8d. be henceforth contributed by the Military Chest towards the support of Police, Gaols and Judicial Expenditure, as being the fair proportion of that expenditure chargeable of right on the Imperial Treasury; that in the event however of the alternative of sending out the above number of immigrants being preferred to a money re-imbursement, it will, in their opinion, be an indispensible adjunct to so large and sudden an accession to their population, that a loan be raised in England on the security of the public lands of the Colony and under the Guarantee of Parliament, of not less than 500,000l. payable by five annual instalments of 100,000l. each, to be by law invested in public and other necessary internal improvements, under the approbation of the Governor and Legislative Council during the progress of such immigration, in order that if the various avenues of domestic industry should not suffice at once to absorb so large an addition to their numbers, adequate employment may be afforded by means of those public works which, in a rapidly progressing state of society, are constantly required to be provided for the increase of population.

And the said Petitions were ordered to lie upon the Table.

Molyneux's (Follitt's) Estate Bill.

Bolton and Leigh, Kenyon and Leigh Junction, North Union, Liverpool and Manchester, and Grand Junction Railway Companies' Amalgamation Bill.

And a Motion being made, and the Question being put, That the Amendments made by the Committee to the Bill be now read a second time; the House divided:

The Yeas to the new Lobby;

The Noes to the old Lobby.

Tellers for the [Viscount Sandon, Sir Howard Douglas]: 67.

Tellers for the [Mr. Miller Gibson, Noes, Mr. Cobden]: 23.

So it was resolved in the Affirmative.

The said Amendments were accordingly read a second time, and agreed to:

Ordered, That the Bill, with the Amendments, be ingrossed.

Resolved, That an humble Address be presented to Her Majesty, that She will be graciously pleased to give directions that there be laid before this House, a Return of the Population, Revenue, Expenditure, Exports and Imports of New South Wales, including the Port Phillip, in each year, from the 1st day of January 1836 to the 31st day of December 1844, inclusive.

Ordered, That the said Address be presented to Her Majesty by such Members of this House as are of Her Majesty's Most honourable Privy Council.

The House was moved, That the Order made upon the 26th day of June last, that there be laid before this House, a Return of the Annual Amount of Money taken at the door of Westminster Abbey and Saint Paul's Cathedral, be taken at the door of Westminster Abbey and Saint Paul's Cathedral, for Admission, during the years 1841, 1842, 1843 and 1844, distinguishing each year and month, and of the Appropriation of such Money, with a Return of the Sum or Sums charged at present for admitting individuals to see the Public Monuments in Westminster Abbey and Saint Paul's Cathedral (in continuation of Returns ordered to be printed, 24th April 1837), might be read; and the same being read:

Ordered, That a Return so much of the said Order as relates to Saint Paul's Cathedral be laid before this House forthwith.

After which Her Majesty was pleased to make a Most Gracious Speech from the Throne, to both Houses of Parliament, as followeth:

My Lords and Gentlemen,

I rejoice that the state of Public Business enables Me to release you from further attendance in Parliament.

In closing this laborious Session, I must express to you My warm acknowledgments for the zeal and assiduity with which you have applied yourselves to the consideration of many subjects deeply affecting the public welfare.

I have given My cordial assent to the Bills which you presented to Me for remitting the Duties on many articles of import, and for removing restrictions on the free application of capital and skill to certain branches of our Manufactures.

The reduction of Taxation will necessarily cause an immediate loss of Revenue; but I trust that its effect in stimulating commercial enterprise, and enlarging the means of consumption, will ultimately provide an ample compensation for any temporary sacrifice.

I have witnessed with peculiar satisfaction the unremitting attention which you have bestowed on the measures recommended by Me to your consideration at the commencement of the Session, for improving and extending the means of Academy Education in Ireland.

You may rely upon My determination to carry those measures into execution in the manner best calculated to inspire confidence in the Institutions which have received your sanction, and to give effect to your earnest desire to promote the welfare of that part of My Dominions.

From all Foreign Powers I continue to receive assurances of their friendly disposition towards this Country.

The Convention which I have recently concluded with the King of the French, for the more effectual suppression
